

ARAVINDDAKSHAN S

Frontend Developer

<mailto:aravindd03@gmail.com> | +91 9840402289 | Chennai, India

SUMMARY

Frontend developer who builds responsive, production-ready web apps with React, JavaScript (ES6+), REST APIs, Tailwind CSS, and Bootstrap. Comfortable building reusable components, wiring up APIs, and adding real-time features with Socket.IO — across both desktop and mobile. Used to working closely with backend developers and stakeholders to fix issues, ship features, and make the whole workflow smoother.

EDUCATIONS

Sri Sai Ram Engineering College - Mtech Cse(5years integrated course), CGPA: 7.18	2021 — 2026 Chennai
Holy Family Convent Matriculation Higher Secondary School - 12th Standard, GPA: 82.6%	2020 — 2021 Chennai
Holy Family Convent Matriculation Higher Secondary School - 10th Standard, GPA: 74.6%	2018 — 2019

INTERNSHIPS

Frontend Developer, Datenstrom-3ag Solutions	Oct 2025 — May 2026 Berlin, Germany(Remote)
• Built new features for both mobile and desktop using HTML, CSS, and JavaScript. • Made site content responsive across devices. • Worked with backend developers to add functionality and fix issues. • Optimized sites for performance across different browsers. • Kept performance steady and fixed cross-browser compatibility issues. • Introduced Git into the workflow, which made team collaboration easier. • Set up SEO and accessibility improvements that boosted search rankings.	
Frontend Developer, Arshan UG	Mar 2025 — Sep 2025 Berlin, Germany(Remote)
• Built mobile and desktop features using HTML, CSS, and JS libraries. • Worked closely with UI/UX designers to turn their designs into working web apps. • Used Git to track changes throughout development.	

SKILLS

- React.js Development
- JavaScript ES6+
- Rest API Integration
- Git, Github
- Bootstrap
- Tailwind CSS
- Responsive Design

PROJECTS

Agilis Advisors — Business/Advisory Website

Frontend Developer

- Built and improved a responsive, production-ready site for Agilis Advisors, with a focus on clean UI, usability, and making it work well across devices.
- Set up a JSON-based content system so the team could update site content and images without touching the frontend code.
- Created reusable components and hooked up dynamic content to keep the site easy to maintain and scale.
- Made sure the layout and experience worked well on desktop, tablet, and mobile.
- Worked with the team to turn requirements into real features, troubleshoot problems, and keep improving the site.

Spare-Xpat — Marketplace Platform

Frontend Developer

- Built a second-hand marketplace platform covering the full buyer and seller journey.
- Created reusable React modules for browsing products, managing listings, creating product bundles, seller profiles, favorites, reviews, and account settings.
- Connected REST APIs for auth, listings, profiles, reviews, and other user actions — handling loading states, errors, and protected routes along the way.
- Added real-time chat between buyers and sellers with Socket.IO, including unread counts, typing indicators, and online status.
- Built mobile-first pages with search, filters, sorting, pagination, and image galleries.
- Worked closely with backend developers to turn requirements into working features and fix integration issues.

LifeConnect Blood Hero — Blood Donation & Emergency Matching Platform

- Built a multi-role platform for donors, recipients, hospitals, and admins, with secure login and role-based access.
- Built a smart matching engine that checks blood-group compatibility, donor eligibility, and distance (using the Haversine formula), with wider search radius for emergencies.
- Handled the full lifecycle of a blood request — from donation and testing to inventory, allocation, and fulfillment.
- Added real-time notifications with Socket.IO for emergency alerts, donor availability, and request status updates.
- Added Aadhaar text extraction via OCR, audit logs, QR-based verification for blood units, automatic expiry tracking, and inventory management with MongoDB.
- Built in safeguards for concurrent blood-unit allocation, API validation, and security checks — backed by automated tests (48/48 passing).

CERTIFICATIONS

State Planning Commission & SDG Coordination Centre,Chennai	June 2024 – July 2024
Developed data visualizations and analytical reports.	
Collaborated with senior consultants on policy-level data interpretation.	
Certificate issued by Ramesh Chand Meena, IAS, Additional Chief Secretary (Planning & Development).
